Rule: Finance operator aur approver alag log — maker-checker.

Design rules

- 1. `users.role` column mat banao — ek insaan ke kai roles honge. Alag `role_assignments` table with scope.
- 2. Agency host ka paisa kabhi touch nahi karti — platform seedha host ko pay karta hai.
- 3. Reseller pehle pay karta hai, tab coins milte hain. Credit par kabhi nahi.
- 4. Host-agency link apni table mein, `effective_from` / `effective_to` ke saath.

2. **Cosmetics share** — coin spend ka kitna hissa zero-payout items mein. Target: 20-25%. Sabse sasta lever.

3. **Point-to-rupee rate** — 130 points = ₹1. Aakhri dial, pehla nahi. Hosts turant notice karte hain.

Ek line mein

₹1,000 mein se **₹350-550 platform rakhta hai**. ₹300 host ko kyunki woh content banata hai, ₹36 agency ko kyunki woh host laati hai, ₹120 reseller ko kyunki woh user laata hai. Baaki tax aur infra.
